SUMMARY

Full Stack and Mobile Developer at Level33, working across 14 concurrent web and mobile systems, a number that keeps growing with new projects: public healthcare, taxation, health inspection, environment and fire department, plus a multi-tenant private ERP. On mobile, I build React Native (Expo) apps with offline-first architecture and ship Android staging and production builds. I deliver on both ends of the stack, using React, TypeScript and Next.js on the front and Node.js/Express and C#/.NET 8 on the back, over PostgreSQL with Prisma and Entity Framework Core. Since 2025 I have also built e-commerce automation in Python and API integrations with OAuth 2.0. Computer Science undergraduate at UCB.

TECHNICAL SKILLS

- **Frontend:** React, TypeScript, Next.js, Vite, Tailwind, shadcn/ui, TanStack Query/Router, Zod, responsive (mobile-first) design
- **Desktop:** Electron (Nextron), cross-platform installers and auto-update
- **Mobile:** React Native (Expo), SQLite and AsyncStorage (offline-first), background sync, Android builds (APK)
- **Backend:** Node.js/Express, C#/.NET 8, ASP.NET Core, Prisma ORM, Entity Framework Core, REST APIs, SignalR/WebSocket
- **Databases:** PostgreSQL, SQLite, relational modeling, migrations
- **Data & Automation:** Python (data pipelines, XLSX automation), API integrations, OAuth 2.0
- **Tools:** Git, GitLab, GitHub Actions (CI/CD), Docker, Playwright (E2E testing), Lighthouse

EXPERIENCE

Full Stack & Mobile Developer — *Level33* *May 2026 – Present*

Brasília, Brazil · Hybrid · 14 web and mobile systems in production (and growing as new projects come in) for the public sector (healthcare, taxation, health inspection, environment, transportation, fire department) and private companies · 800+ commits across 30+ repositories

- **Prontobook (public healthcare management, Brazil's SUS · Node/TypeScript + React):** led the system's complete UI/UX refactor and work on implementing new flows and fixing broken legacy flows, from backend to frontend.
- **DF Legal (licensing and public fee collection for the Federal District · React + C#/.NET):** integration with the government tax-assessment system (SISLANCA), with attempt history, exemption rules and legally compliant reasons; assessment suspension and closing, self-numbered declarations and server-side CPF/CNPJ validation.
- **Menu na Mão (multi-tenant restaurant ERP · Next.js + C#/.NET 8):** supply chain (suppliers, purchasing, stock), Onboarding and Audit modules, order tabs with partial item splitting, tips and time tracking with an hour bank across periods.
- **Mobile:** work on 6 React Native (Expo) apps, including VISA-DF, VigDigital, DER-RJ, SUBAS and IUBAAM, from implementation to Android staging and production builds.
- **UI/UX redesigns:** rebuilt from scratch the admin panel for the Rio de Janeiro State Fire Department (CBMERJ) on top of the existing backend, and the Expo monitoring app, both delivered.
- **Day to day:** end-to-end ownership, front and back, across several systems at once: requirements analysis, implementation, bug fixing and testing, working through issues and reviewed merge requests on GitLab and daily stand-ups presenting what was delivered that day.

Administrative Manager — E-commerce Automation & Operations — *Le Parfum* *Feb 2025 – Present*

Brasília, Brazil · Remote

- Built a Python SEO pipeline that rewrote and standardized a 677-product catalog, replacing manual listing work.
- Automated bulk product registration in Bling ERP via XLSX imports, removing the item-by-item bottleneck.
- Implemented integration with the Bling ERP v3 API over OAuth 2.0 for catalog and stock synchronization.
- Manage ERP-to-marketplace integrations (Mercado Livre, Shopee, TikTok Shop, Amazon): catalog, stock and orders.

Administrative Apprentice — *Brasil 21* *Feb 2024 – Nov 2024*

Brasília, Brazil

- Supported corporate governance routines: document organization and spreadsheet management.

PERSONAL & FREELANCE PROJECTS

Veche — social platform for gamers (desktop) Download ↗

- Desktop app combining Discord-style servers and channels (real-time chat, voice and screen sharing, roles and permissions, invites, presence), an X (Twitter)-style social feed and a Hydra-inspired game library with artwork from Steam, GOG and SteamGridDB. Co-developed with a partner, with an even split of commits.
- **Client:** Electron + Next.js (Nextron), React, TypeScript and Tailwind, with Windows, macOS and Linux installers and auto-update. **API:** ASP.NET Core (.NET 9), Entity Framework Core and PostgreSQL, SignalR (chat and presence), LiveKit (voice and screen), JWT and media on Cloudflare R2. Deployed with Docker and GitHub Actions CI/CD on Oracle Cloud. Private repositories.

Professional landing pages — original, responsive design drakarenxavier.com ↗ · lesignature.com.br ↗

- Live sites for a facial aesthetics clinic and a medical office rental space, built in Next.js with their own visual identity and a mobile-first layout that adapts to any screen. Highlights: interactive drag-to-compare before/after slider, galleries, pricing and plan tables, map and WhatsApp booking CTAs, plus technical SEO (metadata, Open Graph) and optimized WebP images.

Kurio — NFT marketplace (Front-end technical challenge) View project ↗

- Catalog with URL-driven filters, cart, wallet checkout, collector profile and real-time price and stock updates (Socket.IO). React 19, TypeScript, Vite, TanStack Router and Query, Tailwind and shadcn/ui, Zod and React Hook Form, with a REST and WebSocket API mocked by MSW.
- Idempotent checkout with safe retries, BigInt money math and 15 simulated failure scenarios (offline, timeout, price change). 70+ Playwright E2E tests (desktop and mobile, visual regression and accessibility); Lighthouse 100 for accessibility, best practices and SEO.

Offline Bible — mobile app (React Native/Expo)

- Bible reading app working offline via AsyncStorage and consuming a REST API. One of two complete apps I delivered for an internal Level33 technical review that asked each developer for one.

Le Parfum interactive kiosk — mobile app (React Native/Expo)

- Tablet catalog with olfactory filters and an AI virtual consultant (Claude API), syncing products through Bling ERP v3 over OAuth 2.0. The second app delivered in the same review.

Personal portfolio View site ↗

- Self-built static site in HTML/CSS/JS with light/dark themes and an English version.

EDUCATION

B.Sc. in Computer Science — Universidade Católica de Brasília (UCB) *Expected 2029*

LANGUAGES & COURSES

- Portuguese: native
- English: advanced technical reading (documentation and code); conversational level developing
- Python for Data Analysis — Udemy
